

Job offer
Toulouse (France), April 2022

Network Telecom & Cybersecurity Manager

About ANYWAVES

ANYWAVES develops revolutionary antennas for the satellite constellations market. Based on a breakthrough technology and an expert team, ANYWAVES designs and manufactures according to space standards a new generation of high quality antennas, on demand or off-the-shelf.

Unique European « pure player » antenna equipment manufacturer, ANYWAVES has sold more than 90 flight models since its inception in 2017 and reached a 1-million euro turn-over in 2021.

Based in Toulouse (France), the European Space capital, the company aims to become the leader of miniature antennas for critical systems.

About the position

Reporting to the Operations Department, your mission is to ensure that the ANYWAVES' IT systems (hardware and software) are functioning properly and support each department within the company. In collaboration with the Information Systems Security Manager, you will contribute to the deployment of and compliance with ANYWAVES' security policy. ANYWAVES is on the path to ISO27001 certification, in this case, the candidate has the potential to become the principal driver.

Operational management of IT systems:

- Deploy, configure, administer and maintain in operational condition all of ANYWAVES IT systems;
- Configure and manage access rights from security guidelines;
- Participate in the definition of the IT investment strategy and implement it;
- Provide IT support to all employees;
- Deploy, configure, administer and maintain in operational condition all digital security tools (VPN, firewall, encryption tool, ...)
- Participate in the definition of the IT security strategy and implement it.

Quality and safety:

- Manage the process to 'secure the information system'
- Contribute to the implementation and improvement of processes related to cyber protection with a view of obtaining ISO27001 certification.
- Contribute to the improvement of the Quality Management System (QMS) and IT Security Management System (WSIS)

General:

- Contribute to the influence of ANYWAVES
- Contribute to the feedback of strategic information to management.

Soft Skills:

- You are rigorous, autonomous, academic,
- You have a strong sense of team spirit & teamwork, and a high interest in cyber security.

Qualifications:

- Senior technician with a minimum 10 years of experience or Engineer with more than 3 years of experience.

Start: as soon as possible

Contract type: permanent

Location: Toulouse, France (31000)
